Based in Hong Kong, Kowloon

EDUCATION

- Hong Kong Baptist University:** Sept. 2026 – 2027 (Expected)
- Master of Science (MSc) Degree: Information Technology Management
 - Residence: Dr. Ng Tor Tai International House, Kowloon Tong, Hong Kong
- University of Cape Town:** 2023 – 2025
- Bachelor of Science (BSc) Degree: Computer Science and Business Computing (Information Systems)
 - Final year Information System major average: 68.80% at NQF level 7.
- Woodhill College High School:** 2018 – 2022
- Final National Senior Certificate grade average of 75% at IEB academic level.
- Languages:**
- English (native-level), Cantonese (native-level), Mandarin (proficient level)

TECHNICAL SKILLS AND RELEVANT COURSE WORK

Tech Stack: Java · C# (.NET / ASP.NET Core) · Python · TypeScript · Angular · SQL (MS SQL Server) · Excel · R · Git · Azure DevOps · pandas · numpy · Jupyter Notebook · Linux/Bash · AWS Cloud Fundamentals · Docker (exposure) · LLM/AI tools (Claude Code, etc.)

Technical Content: Advanced Software Design, Theory of Algorithms, Theory of Computation, Operating Systems, Computer Networks, Concurrent and Parallel Computing (including practical work in Java), Computer Architecture, Data Structures, Ethics, Business Process Management, Enterprise Systems, I.T Project Management, Data Science and Analytic Tools

PROJECT EXPERIENCE

Maximum Satisfiability (MaxSAT) project with NP-hard problem optimization (completed in Rust); Peer-to-peer protocol data transfer system (Socket Programming); Hotel Booking System app development (completed in C#); Business Process Management project with City of Cape Town Clinic; ERP systems; Data Analytics and Reporting with real-time dashboard visualisations using SAP Analytics Cloud and Business Builders; Linguista app – Language Learning Agent using LLMs.

EXTRA-CURRICULAR LEADERSHIP EXPERIENCE

- Chairperson (head of student society)**
- UCT Asian Student Association (ASA) Society Sept. 2025 – 2026
- Lead and oversee the ASA executive team, ensuring alignment with the society's mission and goals.
 - Manage society operations, including event planning, internal coordination, stakeholder engagement, and key decision-making.
 - Represent ASA in engagements with key UCT stakeholders — including the Department of Student Affairs and the Confucius Institute of Cape Town. Representative for ASA at the Occasion of Assuming office Consulate General of the People's Republic of China in Cape Town.
 - Guide and work closely with executive team to plan and deliver cultural, social, and community-building events that showcase rich and diverse Asian culture, strengthening cultural understanding on campus.
 - Foster an inclusive, vibrant community for students of Asian heritage and those interested in Asian culture.
- Subcommittee Member**
- UCT Developer Society Aug. 2024 – Dec. 2025
- Support the committee in planning and executing society events, ensuring smooth operations and engaging experiences for members.
 - Assist with event logistics, including venue coordination, setup, and resource management.
 - Connect and engage with companies and sponsors to secure partnerships and enhance events.
 - Collaborate closely with executive members to ensure events run smoothly.

WORK EXPERIENCE

- Absolute Systems (Pty) Ltd. (Software Engineer, Johannesburg, South Africa)** Mar. 2025 – Jun. 2026
- Worked with [Niall Joubert](#) and [Shaun Wing](#) on developing and maintaining SecureSupportApp, a full-stack admin support tool for the Skylab platform, using .NET MudBlazor component library on the front-end and ASP.NET Core

(C#) with MS SQL Server on the back-end, contributing to both RESTful API design and UI implementation. Worked with Stored Procedures across databases. Configured and managed CI/CD pipelines in Azure DevOps using YAML, automating build and IIS deployment workflows across staging and production environments, reducing manual deployment overhead.

- Designed wireframes and an interactive HTML prototype for the admin support tool, later converting designs to draw.io diagrams for stakeholder documentation and sign-off.
- Built and maintained a TIP (Talent Insights Profile) reporting application as part of the broader internal tooling suite for Cognadev, delivering data-driven reporting features for operational use. Worked in a software team for this project.

Full Stack Co. (Software Development Internship, Cape Town, South Africa)

Jun. 2025 – Jul. 2025

- With guidance and mentorship from developers [Zuleigha Patel](#), [Iffat Mollah](#), and [Joseph Msimango](#), collaborated with a team of interns to implement a full-stack asset tracking system for the company's client using .NET Blazor MAUI, C#, and MS SQL Server, contributing to both front-end (HTML/CSS) and back-end (RESTful API) components.
- Enhanced software reliability by integrating Sentry for real-time error tracking and performance monitoring, proactively identifying issues during development and deployment.
- Worked within a structured team environment applying Git version control. During the internship, took on a mentorship role by guiding less experienced interns while learning from senior developers, strengthening leadership, communication, and critical thinking skills.
- Conducted an agile approach to the project, emphasising teamwork, problem-solving, and delivering iterative solutions and demos under deadlines.

Data Science Corporation (Vacation Work, Johannesburg, South Africa)

Jul. 2024

- Infrastructure & Data Centre Operations: Shadowed [Antony Fok](#) (Trainee Systems Engineer) to assist in the deployment and configuration of new storage nodes at JNB data centres. Observed the full node lifecycle: physical installation, initialisation via Linux command line, and system balancing for data redundancy and resilience. Got a hands-on opportunity to physical install a node and complete setups from scratch at a data centre under the supervision of a systems engineer trainee.
- Core Systems Administration: Developed foundational knowledge of VMware vSphere and PureStorage hardware. Learned Linux-based system management and scripting using bash commands for node status checks and configuration.
- Software Development & DevOps Exposure: Shadowed Developer [Richard Raymond](#) and his team in creating GPU-enabled Ubuntu-server VMs for client AI projects. Gained insight into containerisation with Docker, user permission management, and observed the development of a management portal using PHP.
- Proactively engaged with team members across infrastructure and development to understand full project workflows from infrastructure to client delivery. Took the initiative to create a personal Ubuntu instance on DSC's testing environment to better understand the virtualisation process firsthand.

Amazon AWS Skill Center (Training & Certification, Cape Town, South Africa)

Sept. 2023

- Participated in classroom-style training and practical workshops with seniors [Nigel Solomons](#) and [Tshepo Marokana](#).
- Earned certificates of completion for 8 AWS training courses, totalling over 25 hours of instruction in cloud fundamentals and IT best practices.
- Built a comprehensive foundation in cloud computing through the complete "Becoming a Cloud Practitioner" learning path.
- Supplemented cloud training with essential IT knowledge in security, networking, and storage through the AWS "Computer Foundations" series.
- Applied learning in a practical setting via an instructor-led lab session, gaining initial hands-on experience with the AWS platform.

PROJECT HIGHLIGHTS

- Linguista (Personal Project): Developing a multilingual language learning agent processing word datasets across 20+ languages. Built data ingestion and cleaning pipelines using Python and pandas, with LLM integration for intelligent language tutoring.
- MaxSAT Solver (University Capstone Group Project)
